

Brooks Becton

Experience

Senior Developer

Bounteous

October 2021 - Present

- Develop web technology solutions for a Fortune 500 client in the Entertainment industry.
- Integrate with client teams to help plan work and give technical feedback.
- Provide mentorship by giving career advice as well as answering technical questions.
- Use React, Redux, and Redux Saga to implement new features and fix old issues.

Software Engineer III

Babel Street

July 2018 - October 2021

- Maintain Babel Street's mobile app through development, testing, and design
- Create business value with technologies such as React, React Native, TypeScript, and React Navigation
- Create mockups and designs to explore new ideas then present them to the company at our sprint review
- Participate in Scrum for the mobile sprint team by helping plan sprints, identify impediments, and research different ways to increase throughput

Web Developer

Mississippi State University Libraries

June 2017 - July 2018

- Collaborated with project manager to ensure that tasks are prioritized and deadlines are met
- Implemented mockups and ideas from designer to assure good UX and accessibility
- Created new projects using JavaScript frameworks, such as React and Meteor, ensuring rapid development, good application structure, and robust testing
